

Digital Cameras: A Snapshot

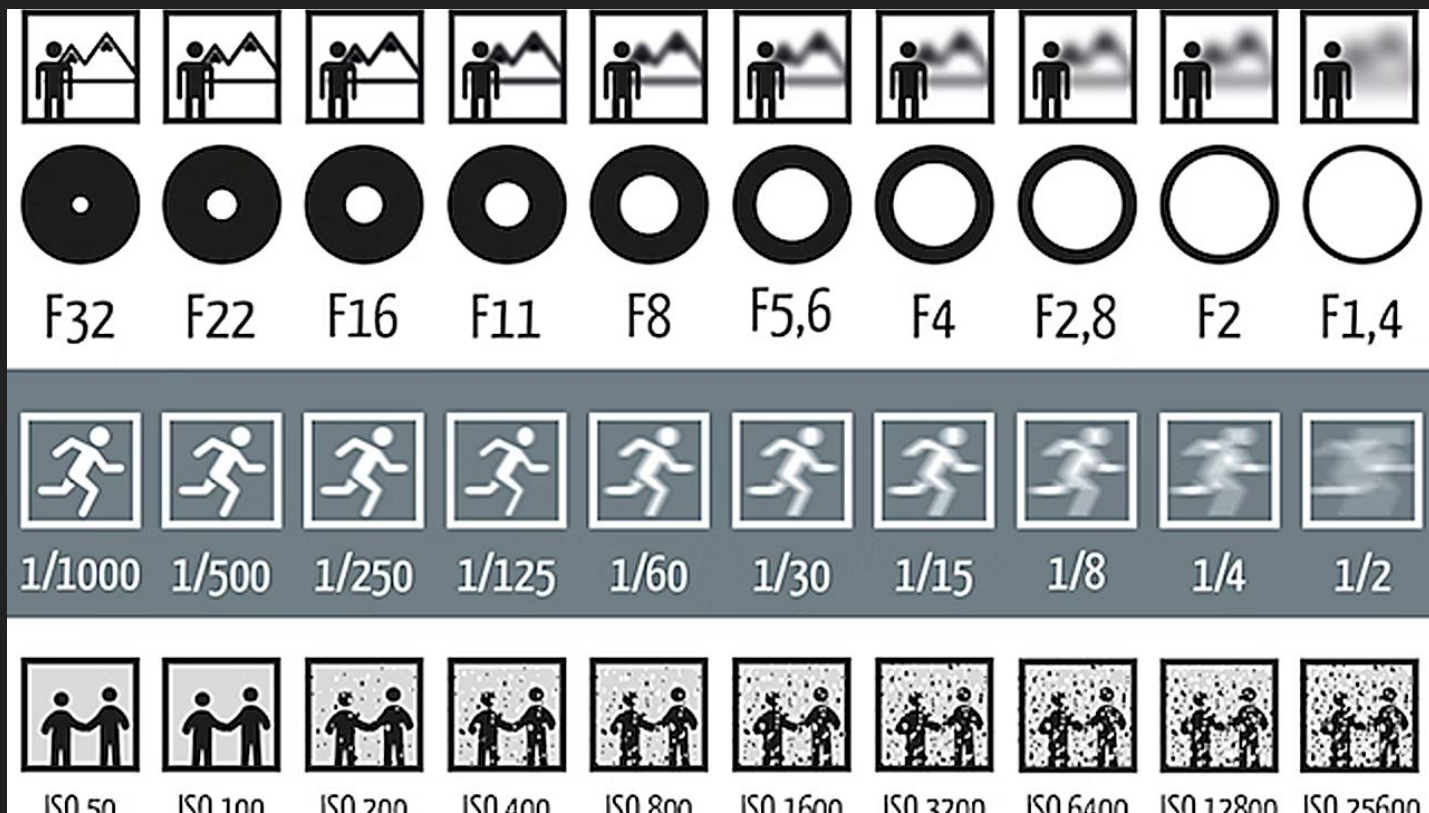

by Pamela Smith

Presentation Sections

Exposure Basics
Basic Functions
DSLR Cameras
Lenses
Mirrorless Cameras
Phone Cameras

The language of photography: ISO, shutter speed, aperture.

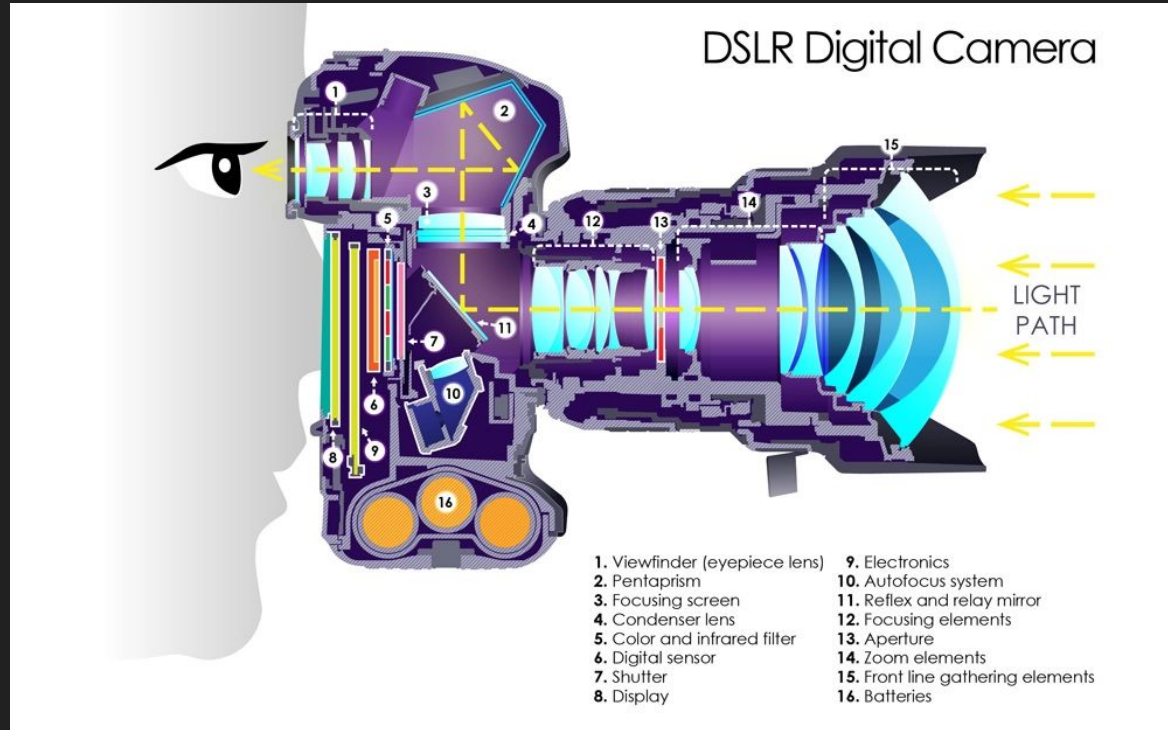

These elements are affected by shooting modes.

A DSLR works with light and mirrors.

DSLR- Digital single lens reflex camera

Light passes through the camera lens first.

EXPERT
PHOTOGRAPHY

Sony E

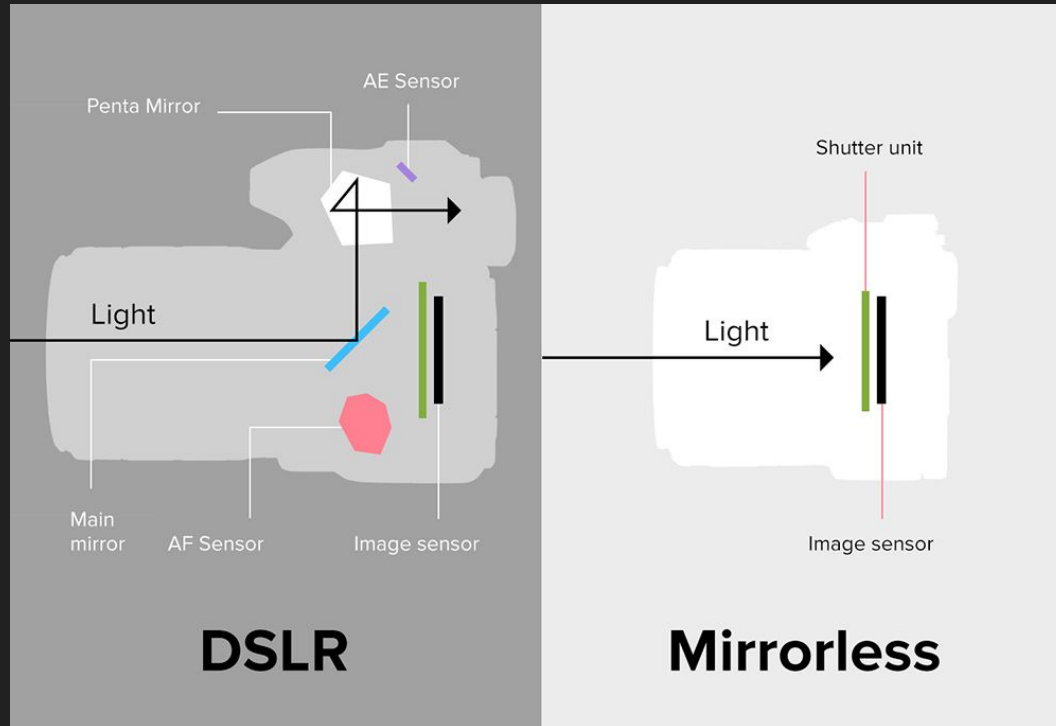

Canon EF

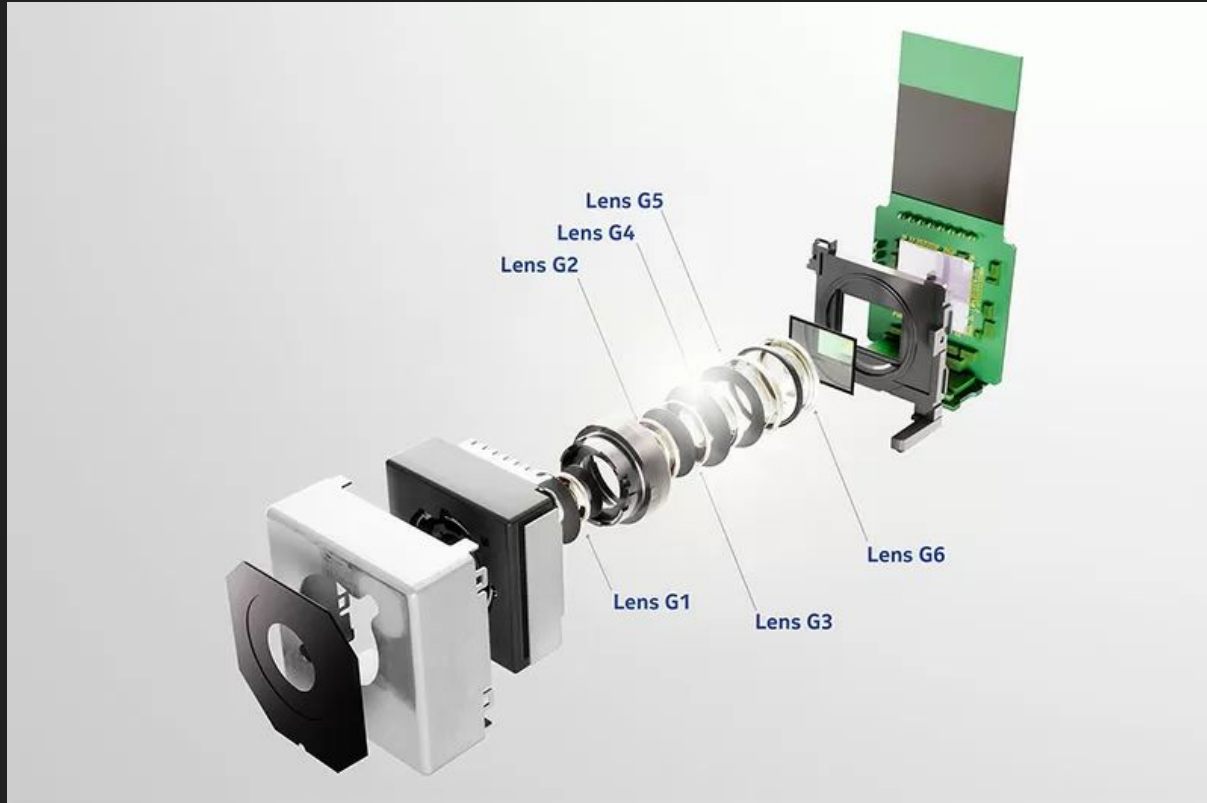

Nikon F

Mirrorless cameras have different shutter and viewfinder functionalities

Phone cameras are compact and small.

Thanks for listening!
